

Build one credential profile, submit to multiple universities world-wide.

Searching for schools and admissions yourself or for your child can be a daunting process, hence the need to register your profile with an education agent who basically increase your chances of getting accepted. However local education agents cover specific countries and specific schools in those countries. This means you'll have to register your profile multiple times with multiple education agents to get a wider coverage of options; which then becomes too expensive in time and costs.

We have aggregated all of these challenges into a single automatic process by connecting to different school search and admission application services worldwide to give you the widest possible coverage and best chance of admission with in built rules for students from Nigeria.

IN SIX SIMPLE STEPS, WE'LL AUTOMATICALLY GUIDE YOU ALL THE WAY FROM PROFILE BUILD TO APPLICATION SUBMISSION; THEREBY SAVING YOU LOTS OF TIME, EFFORTS AND MONEY.
